

***VCN Biosciences at the 2012 Annual Meeting of the European Society of Cell & Gene Therapy in Versailles.***

VCN Biosciences technologies will be again present (from 26th to 29th of October 2012) in the 20<sup>th</sup> Annual Meeting of the European Society of Gene and Cell Therapy (ESTCG) that this year is organized in collaboration with the French Society of Gene and Cell Therapy (SFCGT) in Versailles (France).

During the meeting the manufacturing process used for cGMP (Good Manufacturing Practices) production of VCN-01 will be discussed as a model of single use manufacture in a session devoted to GMP and bioprocess development for GT vectors. In addition, the use of hyaluronidase technology (exploited by VCN Biosciences) will be presented in an oral presentation in the framework of a canine oncolytic adenovirus as a promising veterinary antitumor strategy in the session "Late breaking abstracts and diversified platforms of cell and gene therapy".
